PROFESSIONAL SUMMARY

B.Sc. Computer Science graduate with a foundation in Python, Machine Learning, Data Analysis, Statistics, and Probability. Practical exposure gained through AI Engineering and Web Development internships, including data preprocessing, supervised learning, and machine learning algorithms using Python and Scikit-learn. Interested in contributing to AI/ML Engineer and AI Developer roles by applying skills in model development and evaluation.

TECHNICAL SKILLS

Programming: Python

Machine Learning: Machine Learning Fundamentals, Supervised Learning, Scikit-learn, Data Preprocessing, Model Training, Model Evaluation

Data Analysis: Pandas, NumPy, Matplotlib

Mathematics: Statistics, Probability

Artificial Intelligence: AI Fundamentals, Generative AI Fundamentals

Web Technologies: HTML5, CSS3

Database: SQL Basics

EDUCATION

B.Sc. Computer Science 2023 – 2026
Government College for Women (A), Kumbakonam — Bharathidasan University
Percentage: 85%

Higher Secondary (12th) – Computer Science 2021 – 2023
Al-Ameen Matric Higher Secondary School, Kumbakonam
Percentage: 80%

SSLC (10th) 2020 – 2021
Al-Ameen Matric Higher Secondary School, Kumbakonam
Result: Pass

INTERNSHIP EXPERIENCE

AI Engineering Intern 6 Months
SwordNex Technologies Pvt. Ltd.

- Applied Python and Machine Learning concepts to real-world datasets, including data preprocessing and preparation for model development.
- Implemented and worked with supervised learning algorithms including KNN, SVM, Logistic Regression, and Naive Bayes.
- Developed, trained, and evaluated machine learning models using Python and Scikit-learn for classification and prediction tasks.
- Gained practical exposure to AI/ML workflows, with basic hands-on exposure to TensorFlow and PyTorch.

Web Development Intern 6 Months

Vaagai Infotech, Kumbakonam

- Gained practical exposure to basic web development and frontend development.
- Worked with HTML5 and CSS3 to structure and style web pages.
- Developed technical and teamwork skills through practical development activities.

PROJECTS

Laptop Price Prediction

- Built a machine learning project to predict laptop prices based on features such as RAM, storage, processor, GPU, and usage type.
- Performed data preprocessing using Python and Pandas, and developed the prediction model using Scikit-learn.
- Created an interactive prediction application where users enter laptop specifications and receive an estimated price.

Customer Churn Prediction

- Developed a supervised machine learning classification project to predict whether a customer is likely to churn.
- Performed data preprocessing and categorical feature encoding on customer data.
- Implemented classification and prediction using Python and Scikit-learn.

Bank Locker Management System

- Developed a web-based application for managing bank locker and customer information.
- Implemented locker allocation, availability tracking, search, and record management features.
- Built the application using HTML and CSS with database-based application concepts for managing locker and customer records.

CERTIFICATIONS

- AI Engineering Certification
- Web Development Certification
- Microsoft Excel Certification
- Foundation of Coding with Python – Naan Mudhalvan / Infosys Springboard
- Typewriting – Junior(Distinction)

LANGUAGES

Tamil – Fluent | English – Working Proficiency | Hindi – Proficient | Urdu – Proficient
